6) Project Title and Description

a) Title: TripleR by WORM

- b) Description: A police misconduct reporting platform iOS app for users to share their experiences and encounters with police by recording important details and evidence of these encounters in a secure, encrypted database. The goal of this app is to provide users a “Report” function that requests information essential to accurate local officer misconduct reports such as officer name, description, vehicle number, witness information, and event description so that a report can be filed more accurately in each community. There will also be a “Record” function that captures events like traffic stops on video. The record functionality is user dependent (user controls if and what the app is recording). There will also be a settings page that will allow users to customize some special features of the application or change the app's permissions. Finally, we aim to provide a “Rights” page that lists users’ rights when they are stopped or in tense situations with police. As the scope of law changes drastically in different states, the primary focus will be national laws upheld in Florida as well as state specific law that may aid a person's speech when encountering an officer.
